***備註 Remarks :**

該科技能在建造過程為改善工地安全帶來裨益，例如：(i)消除工人面臨的安全風險；(ii)大大降低安全風險或危險；(iii)保護工人所面臨的安全風險；(iv)能定期或持續監察及提供安全警示以快速應對意外或事故；及(v)能應對不斷調整的風險評估。

The technologies shall have significant merits in directly improving site safety in the construction process, for example, (i) Eliminating workers' exposure to safety risks; (ii) Considerably reducing safety risks or hazards; (iii) Protecting workers from safety risk exposure; (iv) Provision of periodic or continuous monitoring and safety alert for quick responses to accidents or incidents; and (v) Enabling dynamic risk assessment.

常見問題FAQs

問Q

我們公司是否需要向基金秘書處申請提升資助上限？
Do we need to apply to the CITF Secretariat to enjoy the uplifted ceiling?

答A

所有合資格申請者均會自動享有新的資助上限，毋需另行向基金秘書處申請提升資助上限。
Eligible applicant can enjoy the new funding ceiling automatically without the need to make application for uplifting the fund ceiling.

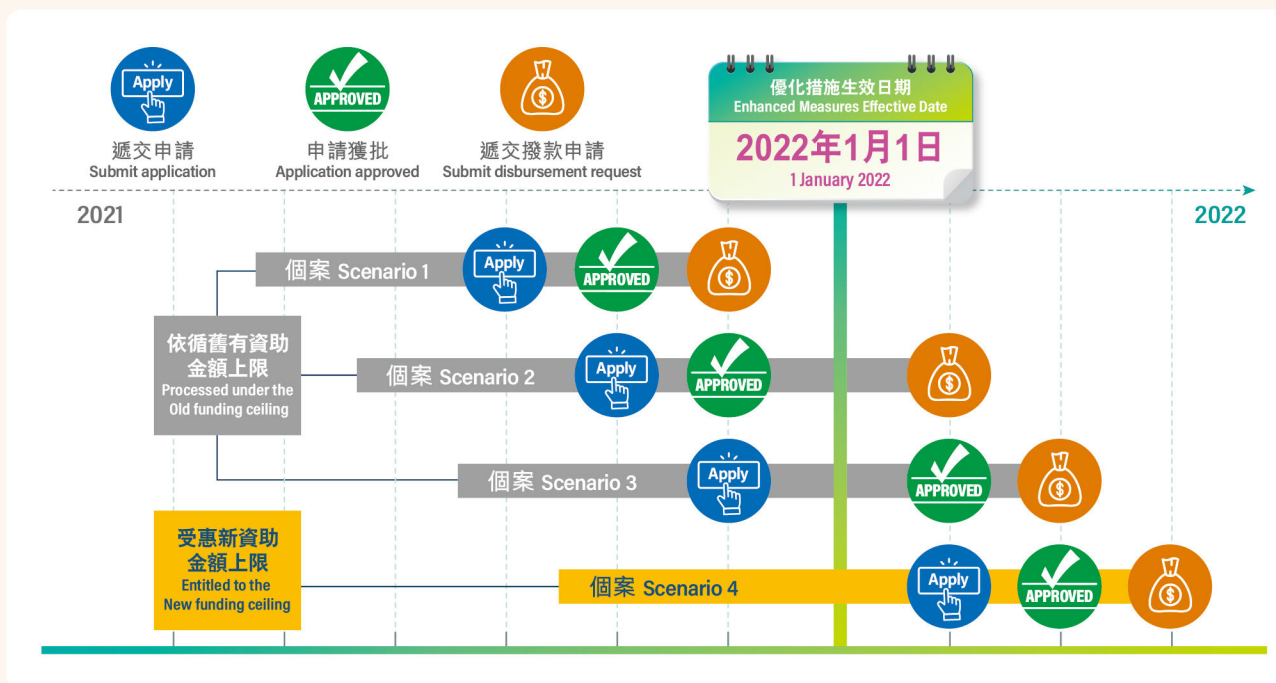

問Q

可否詳細解釋新資助上限的適用情況？
Can you explain the application of the new funding ceiling in details?

答A

- 新資助上限只適用於在正式生效日期（即2022年1月1日）或之後遞交的基金申請。換言之，所有在正式生效日期前遞交的申請，不論其獲批日期，均會依循舊有資助上限處理。[請參閱下圖]
- 在正式生效日期前遞交/獲批的基金申請，其撥款申請亦會採用舊有資助上限。[請參閱下圖]
- 已達舊有資助金額上限的申請人，若仍符合基金申請資格，措施生效日期後申請亦能受惠於新資助上限。
- New funding ceilings are only applicable for applications submitted on or after effective date (i.e. 1 January 2022). In other words, all applications made before the effective date, irrespective of approval dates, will be processed under the old funding ceiling. [Please refer to diagram below]
- Disbursement requests of application made before effective date will follow the old funding ceiling. [Please refer to diagram below]
- Applicants which already reached the old funding ceiling, if remain eligible for the CITF, are entitled to the new ceiling.

問Q

香港的先驅應用項目涵蓋什麼？
What is Pioneering Application in Hong Kong?

答A

香港的先驅應用項目計劃旨在資助合資格申請者引入具潛力並能為建造業廣泛應用的新興科技。若該科技能夠在香港加以採用，不論是在非香港地區發展的成熟科技，或者該科技經優化、結合甚至加強並賦予新的應用功能，均可申請。

Pioneering Application in Hong Kong aims at subsidising the cost of eligible applicant to bring in emerging technologies which have good potential for wider benefits of the local construction industry. The technology could either be a proven technology outside Hong Kong which is newly adopted for on-site application in Hong Kong, or modification, combination or enhancement of technologies already exist in Hong Kong but put to a new functional use.
