Land Conservation Petition

52501

Submission ID	4127022761745816577
Submission Date	14 09 2018 10:44:36
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	Since 1997, we lower range citizens have not got a reasonable housing plan to meet our public needs. A location was established/built a wide public housing estate and which was sold to the private company years ago, and the original public housing people were pushed to move to other locations. Now, we can find that the location has been built several private rich household there, north point pier. Why HK Government revenue is increased yearly without any considerations about our public needs? I don't hope HK Government can help the public yearly but I strongly reject the lan reclamation plan from her.

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	Please use brownfield sites before reclaiming the sea. Marine life is under great pressure as it is with the huge amounts of rubbish and unsustainable fishing going into the water. Hong Kong is an amazingly beautiful place with amazing wildlife and it is in the interests of all Hong Kong residents that we steward it carefully for future generations. If there is brownfield land to use first I urge you to use it rather than encroaching on the sea and our unique and beautiful country parks, which are the lungs of Hong Kong. Thank you!

Your opinion	Reclamation has been successful in the past but habitats have been modified and the mitigation measures unsuccessful. Use the land we have available, make difficult choices for better final solutions this time. Ultimately it will be better for Hong Kong. Review the housing figures carefully and prioritize those who really need. Build old people care homes and single room hostels. Not everyone need a flat.
	I agree

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value.

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	"Reclamation" is wrong terminology.It is misused to describe taking land which belongs to the sea. Government should look to any other alternative before resorting to the sea.

Your opinion	With global warming already increasing the sea levels in coastal areas worldwide, reclamation increases the sea levels further. Where do you think all that seawater will go if people keep dumping soil/land into it? If housing is really of an immediate concern, while following safety regulations, convert old factory buildings into living quarters. Currently, there are a lot of private units which were sold but has no one living in them for years. The government should act and discourage property hogging which only benefits wealthy and greedy individuals/households, in turn, artificially inflating the property market, making properties unaffordable for medium waged income households who goes just over the household income cap and below the considered high income earning household .

Your opinion	I agree that reclamation is not a responsible solution in and of itself. The arguments linking housing shortage to reclamation are tenuous at best. There is land in Hong Kong now that is underutilized. I also believe that continued growth in the current fashion is not sustainable. HK seems heavily focused on growth and massive infrastructure projects. Perhaps managing the level of growth in a more balanced manner is a better solution.

Submission ID	4126664909831211273
Submission Date	14 09 2018 00:48:10
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Submission ID	4126607299021305128
Submission Date	13 09 2018 23:12:09
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	The government needs to balance the short term demands with long term interests of future generations. Destroying habitats is not a long term sustainable solution. Reusing brownfield sites is efficient allocation of resources to obtain space for Hong Kong's housing needs.
	I agree

Your opinion	香港房屋建设须要量化香港三维空間，不是平面，土地问题。現在因 史原因，很多土地使用率低。如有大量楼層数少的公务员楼土地使用容積率低，及社团會所浪费士地，空置工贸等。香港可用立体房屋空間欠缺量化。政府應控制香港可容纳人口，不可以無限制地增加人口，土地和水域是有限的自然資源，是香港人及他们后代的资源，不可以用盡香港人子孙的自然資源，該保留给后世。不可再填海，破坏属于将来香港人的自然环境和海洋遺產做人工岛。日本大坂机場人工岛不敌天然力量的破坏，要引以爲鉴。

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	雖然對香港土地政策不熟悉, 但我聽聞棕地原本是用作給新界原居民住屋及農耕用途, 但現在明顯是偏離原意。如是用作廢料回收場/廢車處理等, 我認爲需要面積大而地租相宜土地是情有可原。但部分只淪爲爛地或非法垃圾場, 對環境, 民生都帶來不良影響。如此浪費土地, 更容易讓其他市民認爲原居民是特權階級, 不管有多少人住 房, 政府亦不敢觸碰原居民逆鱗。難怪讓部分人認爲官商勾結。 房小孩不懂發聲, 生態環境不懂發聲, 但原居民懂發聲, 卻偏偏避開不討論, 非要市民從2個不懂發聲的弱勢中二擇其一。難道土地政策不是權衡民生利害, 而是欺善怕惡?!

Your opinion	Development of the Brownfield land in HK will make provision of affordable housing cost effective. I live on Lantau and I'm disappointed that beautiful south Lantau is seeing so much luxury housing being built. Only people with very high incomes can afford to live in those places. Everyone needs nature to de stress from their hard working lives in HK. Green spaces help protect the air we breathe too.

Submission Date	13 09 2018 21:31:29
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	The government wants to enrich its crony friends by awarding big construction contracts involving reclamation, which is damaging to nature and our future. A government that cares about its citizens would recognise the importance of respecting nature and treading carefully. The government tells us lies about the availability of brownfield sites. There are abundant brownfield sites suitable for housing. Hands off our country parks! Hands off our oceans!

Submission Date	13 09 2018 20:09:12
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	如果官員是不能離家的珊瑚住在海床，突然某種生物自以爲是覺得較優越的認爲生活空間不夠，將大量泥沙覆蓋和破壞海床，這是否應該？ 同時，香港政府善用已發展土地和將一些閑置的軍事用地，回收政府租給私人的哥爾夫球場，能短期解決土地短缺的問題。 我了解有利益團體想用保持利益，不想將現有土地改變用途，但是如果香港政府是爲了絕大多數人的利益，應該回收土地。

	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.

Your opinion	I want to see Hong Kong's nature and marine areas protected for the future, not just for humans but also all the immense wildlife that calls Hong Kong home. It would be a real shame to build the ELM and destroy an area that is host to so many living creatures. Our world and city is not about profit and concrete! Moreover, creating homes for people on reclaimed land detaches them from nature, which is an essential connection to the environment that provides us drinking water, air, and food!

Submission Date	25 08 2018 17:17:37
	I urge the government to adopt a “brownfield first” policy to address short term housing problems. I urge the government to safeguard the integrity of Hong Kong’s incredible country parks to prevent irreversible damage to our natural areas. I urge the government to safeguard vulnerable marine habitats and species by not reclaiming any ecologically sensitive areas and waters of unknown ecological value. I urge the government to safeguard actively managed farmland, fallow arable land with agricultural and/or ecological value, and farmland with potential for rehabilitation, and formulate an agricultural land compensatory mechanism to release lands with good potential for rehabilitation if privately owned agricultural land with lower agricultural and ecological value is identified for development.
