The state of the s	to: tfls(@devb.gc	v.hk		13/07/2018 18:24

致土地供應專責小組:

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

- 政府應優先發展棕地,有研究已經指出,香港的棕地及粉嶺高爾夫球場等已經足以應付香港未來的房屋需求;
- 郊野公園及其邊陲地帶以及填海都不應該成為土地供應的選項(不論是短期、中長期或概念性選項),其他的自然土地資源(如農地)亦應謹慎看待。因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。
 - 請特區政府勇謀兼備,處理新界存積已久的土地規劃不公問題。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正 落實可持續和以人與生態為本的發展規劃。

順祝 台安!

(1)	Kevin Tither's an option for d	evelopment	and Supply - Country Pa	13/07/2018 17:56

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Kevin Tither

致土地供應專責小組:

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

- 政府應優先發展棕地,有研究已經指出,香港的棕地及粉嶺高爾夫球場等已經足以應付香港未來的房屋需求;
- 郊野公園及其邊陲地帶以及填海都不應該成為土地供應的選項(不論是短期、中長期或概念性選項),其他的自然土地資源(如農地)亦應謹慎看待。因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。
 - 請特區政府勇謀兼備,處理新界存積已久的土地規劃不公問題。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正落實可持續和以人與生態為本的發展規劃。

順祝 台安!

政府必須停止研究發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

希望土地供應小組聆聽民意,促請政府改善規劃,令市民真正安居樂業。

祝 安好!

Rachel 謹啟

		be an option for de	tions on Land Supp evelopment	oly - Countr	ry Parks 13/07/2018 16:40

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Helene Siwan Leclerc

善用棕土,不應發展郊野公園邊陲地帶和填海

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府必須優先使用棕地和私人遊樂場地契約用地,有研究已經指出,香港的棕地及粉 嶺 高爾夫球場等已經足以應付香港未來的房屋需求。

當局不應發展郊野公園邊陲地帶(不論是作為中長期選項的兩個試點,或作為概念性 選項),亦不應在維港以外近岸填海及發展東大嶼都會,對於發展農地也須謹慎處理, 因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。

請土供組如實向特首林鄭月娥反映市民訴求,規劃棕地,保護郊野邊陲地帶。

祝願 閣下生活愉快!

	Francis Ho's s		nd Supply - Country Pa	arks should never be
		@devb.gov.hk		13/07/2018 11:48

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Francis Ho

To The Land Supply Task Force

I have the following comments/recommendations

I preface my recommendations with the following observations

International world city

In order to retain and attract top talent, locally or foreign born, in it necessary to provide the right environment. This includes decent housing, sporting and recreational facilities for such people and their spouses and children.

Wellbeing and enjoyment of life for the general public.

In order to improve the wellbeing and enjoyment of life, sporting and recreational facilities and more open urban spaces are required.

Sporting and recreational facilities will include public and private sports facilities and unspoilt countryside. To minimize both of these for short term gain in announcing some housing targets met is to jeopardise our very future as a livable town.

To increase land supply

Short term

Redevelop brownfield sites.

Develop or redevelop unused, underused and unutilised government sites

Medium Term

For the last 40 years government has delayed cancelling the short term policy introduced by Mr. Akers-Jones to allow uncontrolled development of village housing.

To rectify this the Government should now rescind this policy and dismantle or otherwise contain the power Heung Yee Kuk to control the development of the New Territories. Because of the attitude, as hitherto displayed, of the New Territories people this is best dealt with by buying them out and, to the extent required by my recommendations below, acquiring their land and housing and providing replacement accommodation. This may cause resentment among the hard working majority but I am sure they can be persuaded to accept this approach and cost to the Government (tax payers' money) in the interest of our overall future.

Therefore I seriously recommend that the built up and degraded low-lying lands of the Kam Tin valley and western areas of the New territories be redeveloped as new towns with the land in between left to regrow as open park areas.

Some of this could be started urgently such as with the degraded storage buildings' area in the valley to the west of the Kam Sheung MTR station.

Long Term

Reclamation of areas that have no doubt been identified and earmarked for reclamation.

I would now like to comment regarding private clubs

I think that it is self evident that, if Hong Kong wishes to aspire to its claim to be a world city, then it is clear that to attract and keep talent private clubs, particularly those providing sport and sports training facilities, need to be retained. These are part of the environment that is expected for top talent and also provide training and spectator enjoyment for member and, to the extent the facilities (particularly the sport's field or courts') can sustain the usage, also the public, although in a necessitated and controlled manner.

In addition the imposition of raised government costs (significant rates or land usage costs) will only make clubs more exclusive and raise the cost to the public making use of their facilities. Alternatively by resuming the land it will mean significant additional costs to Government to provide replacement land and sports facilities and maintain them if Hong Kong is remain attractive to anyone.

These comments apply to both the Fanling Golf club and (although not mentioned in the Land Supply media announcements) the Jockey Club. (I play neither golf nor watch or bet on horse racing)

And also the Country Parks.

The Country Parks play a vital role in providing some fresh air for people to breath and as a recreational area for people to get some exercise and this is especially so for our youth. It is already bad enough that the Government does not prevent the illegal desecration and building that is taking place, but if the Government decides to develop parts of the parks, this will mean that the parks will inevitably and continually be reduced for more building of accommodation, roads and other Government inspired "requirements". The resultant loss of this invaluable amenity/recreational resource be grave blow for the wellbeing and physical and mental health for the citizens of Hong Kong

Yours sincerely,

Robin Radcliffe,

香港人多地少,解決市民居住問題,從來不易,解決之道,不應向民粹主義低頭,亦應照顧各階層的利益,個人認為,土地供應,應優先考慮填海造地,大埔內海,青山灣內海均為理想地點.其次應考慮棕地及農地,政府可給予有關業主較優厚的條件,達成換地協議.郊野公園邊陲地方,如不影响生態,亦可考慮.

私人遊樂場的成立,對於吸引及保留中上階層留港發展,例如企業家和專業人士,起了極大的作用,這方面的政策,不能大改,更不應將這些場所的土地,用作建屋,否則,香港將下沉,經濟衰落.

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Carolyn Kng

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府應先用好棕地資源,及私人遊樂場地契約用地,因為粉嶺高爾夫球場和棕地等已 經足以應付香港未來的房屋需求。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

請黃遠輝先生為香港下一代著想,不要開發郊野公園邊陲地帶。 萬分感

謝!

Tang tsz ying 謹啟

		ption for developm	ons on Land Supply - Co ent	ountry Parks should 14/07/2018 12:34

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Jameson McLennan

1	Opinions on Land Supply Debate	15/07/2018 15:48
From: To:	tfls@devb.gov.hk	
-	Iadam, ease find my opinions on the Land Supply Debate and also, s to increase the land supply in Hong Kong.	suggestions on other

Regards,

 $CW\ Kwan$. Land supply debate opinion.docx

Opinion on Land Uses Debate:

Part 1: On top of the 18 options, I offer one more options for the committee to consider:

- The new Yau Ma Tei Typhoon Shelter should be relocated to Lantau Island or other close islands.
 The area should be reclaimed and develop with West Kowloon and the redevelopment of Mong
 Kok and Yau Ma Tei. This is prime area of Hong Kong and can help to make the west Kowloon
 area much more livable.
- 2. The TST East area is getting old and under used. Many commercial arcades there is under used with the close of many old entertainment facilities, like club. This area could be redeveloped into high rise grade A office (like Central). The TST underground network should be extended to TST East to make it more accessible. This could burst the grade A office supply of Hong Kong in the CBD 1 area.
- 3. Redevelopment of Cooperative Estate (合作社): these cooperative estates should be redeveloped into public housing and current owner could either relocate to the redeveloped estate or take compensation as those conducted by URA.
- 4. Fundamental solve of 丁屋 issue:

 - b. Allow consolidation of 丁屋 into high-rise building
 - c. A public bureau should be setup to handle the above two issues.
- Development of Lantau Island: make use of Lantau Island to relocate some of the activities in NT, like farming.
- 6. More aggressive approach on redevelopment of city area in old district like TST, Yau Ma Tei, MK, Shum Shui Po, Cheung Sha Wan, and Tsuen Wan area and etc. The redevelopment should be done in a more wholistic approach instead of current piecemeal approach. Like Yau Ma Tei and MK redevelopment should be considered together with the relocation of the New Yau Ma Tei Typhoon Shelter to create a large piece of land for the whole Kowloon area.

Part 2: Opinions on the current 18 options:

- 1. Development of Brownfield: agree on the directions of development of brownfield area and this should be the priority. Development of brownfield should have objectives to: increase land supply and rectify the environment damage of the brownfield area. Therefore, although the development of the brownfield area may not totally get the same size of land for development, as some part of the land should be served for current commercial use in the brownfield area, the development of these brownfield area should be done asap to resume the environment before the current uncontrolled commercial activities were started. To develop the brownfield area, the consolidation approach should be used:
 - a. Multi-story building for commercial activities that can be up in to building

- b. Move some activities to centralized industrial park, like government should setup centralized recycle industrial park for used car recycle, recycle paper and metal and etc. The new industrial park could be setup in new reclaimed land, like Lung Kwu Tan. New logistics park should also be setup to house container storage activities.
- c. Banned some others low value and polluted activities such as import rubbish/ used car handling.
- 2. Agree on the use of PPP approach for NT agricultural land based on a transparent, open and fair mechanism to speed up the conversion of the agricultural land into better use (residential/commercial). Actually, a mixed use of PPP and Cap. 124 should be used for the development depending on the specific land and its ownership composition. Farmland could be moved to other area like Lantau Island.
- 3. Alternative Use of sites under Private Recreational Leases:
 - a. Agree to review the usage of the PRL especially those granted to private association and does not open for public use. The review should be concentrated on:
 - i. If Hong Kong need to develop the kind of sport / activities using the land, like we may not require land for 木球,草地滾球 and etc. They can share venue with other sport activities.
 - ii. If there are other alternatives that can provide land for relocation of some PRL: like for example, if the Fanling golf club could be relocated to landfill area (堆填區) like the Junk Bay landfill area
 - iii. The development potential of the PRL
 - b. Government should also study if some of the sport activities could be moved to multistory building to have better use of the land.
- 4. Same as point 3 above, relocation, use of landfill area, use of multi-story building should be explored for Land-Extensive Recreation facilities.
- 5. Agree on 5 + 1 reclamation outside Victoria Habour and the artificial island in central water. This could work together with the relocation of the New Yau Ma Tei Typhoon Shelter to find a new site for the typhoon shelter.
- 6. Agree on the development of the East Lantau Metropolis. This should be an integrated approach together with the relocation of the Kwai Tsing Container Terminal and the relocation of the Yau Ma Tei Shelter.
- 7. Agree on the development of caverns and underground space despite the cost and length of the process. There is a lot of mountain in HK, with better use of the caverns, we can increase the land use efficiency and at the same time, protect the mountain and landscape. Underground area development is also a good approach. In the city area, use of underground area, like the connection now we have in TST, can greatly improve city connectivity and at the same time, help to reduce road congestion as people are diverted to underground and reduce the people

- traffic on the road. The TST underground development should expand to TST E, TST W, Jordan, Yau Ma Tei and MK.
- 8. Agree on the development of more NDA in NT. The development should be coupled with the redevelopment of brownfield and solution to resolve \Im issue. NT is a large piece of land in HK and proper development of the area could:
 - a. Release plenty of land for development
 - b. Protect/ rehabilitation of damage area
 - c. Resolve the historical issue of 丁屋
- 9. Agree to the redevelopment of the RTT. Also, it should be planned together with the reclamation of the Lung Kwu Tan area. With the completion of HK-Zhuhai-Macau bridge and advance of other ports along Pearl River Delta, the use of RTT is limited. The RTT area and the Lung Kwu Tan area should be used for
 - a. relocation of some business in the brown field area
 - b. provide additional land / support to high technology development industry as the area is close to Shenzhen
 - c. Part of the area could be used for residential development
- 10. Agree on the study of use periphery of country parks for development, especially those area with less environment value. Say for example, the area along Tuen Mum Highway is full of rocky mountain. These areas may not have high environment value and could be used for development. However, government should also identify areas with high environment value to exchange for the development of those country park periphery area. An exchange mechanism should be setup so that the overall country park area would not be reduced. This could help to reduce public worry on the use of country park for development.
- 11. Please refer to opinion in point 9 above.
- 12. Please refer to opinion in point 10 above.
- 13. Agree to increase development intensity of village type development zone. To review and resolve the Small House Policy, the government should resolve the issue once for all:
 - a. Increase the development intensity of village type development zone.
 - b. Set a deadline / end point to the Small House Policy
 - c. Provide proper compensation to the related parties
 - d. Setup independent public bureau to execute the policy and change
- 14. Agree on the proposal to better use of topside area of transportation infrastructure for development. Apart from transportation terminus, government can study to develop the top side of railway, like along the whole railway. There is a lot of space along the railway line in NT

- and building above the railway could help to provide a lot of area for residential, commercial and recreational use.
- 15. Agree on the study of utilizing the development potential of public Utilities sites. A better planning of public utility of a district and putting some utility into multiple-story building can free up some public utility area for other development.
- 16. Agree to relocate the Kwai Tsing Container Terminals together with the development of the East Lantau Metropolis. Terminal operations is evolving and the current Kwai Tsing terminal may not be the most efficient one. The Kwai Tsing Container port is located in a well connected area and turning it into commercial and residential development is efficient.
- 17. Not agree to use the topside of Kwai Tsing Container Terminal for development. The development of top side of the terminal would have a lot of environment issue. Also, we would loss the chance to modernize the Hong Kong terminal operations if we use the topside of existing terminal for development.
 - a. The topside development would create a huge block in the Kwai Tsing area which would affect the air circulation, noise distribution and outlook of the area.
 - b. The height of development in the Kwai Tsing area is restricted by the air traffic route in and out of HK from HK International airport. Building on top of the Kwai Tsing Container Terminal would be limited with the consideration air traffic route.
 - c. The underneath container terminal development would be restricted. Without modernization, Hong Kong terminal operations may finally be taken up by other terminals in the region. The huge underneath structure may finally be wasted.
 - d. The relocation of the terminal would free up a huge piece of land for redevelopment of the whole Kowloon area.
- 18. Not agree to reclaim part of the Plover Cove reservoir for new town development. The reservoir and its surrounding area is important landscape for Hong Kong. Also, it provides a big reservoir to help HK to store valuable fresh water. Instead of reclaims the reservoir, a better use of the reservoir could be think of, like installation of solar energy panel on the reservoir surface.

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Yong Huh

Dear Sirs,

RE Consultation Exercise by Task Force For Land Supply Retention of Fanling Golf Course by the Hong Kong Golf Club

I am writing to you in support of the Hong Kong Golf Club's position that the entire three course facility at Fanling should be retained and not be turned over for redevelopment for housing or any other purposes.

The most important point I wish to make is that the Task Force is proceeding on two fundamentally wrong assumptions: - (1) that there is a shortage of land; and (2) Government's population targets.

Wrong assumption (1) Shortage of land - The fundamental problem is Government's refusal either to entertain proposals from the large property developers for new development on private land or to allow the increase in production of flats on such land. Officials have focused on rezoning government land only for housing. As a result, over the last 10 years, many areas of green belt [created to safeguard the natural environment from urban encroachment], have been rezoned.

When private-sector proposals are made in respect of private land, they are inevitably rejected. It is almost as if a development possibility not initiated by the government is automatically rejected.

Chief Executive Carrie Lam, in her policy address, accepted the need to work with the private sector to use their resources to help meet both private housing targets and part of the public sector housing production, such as Starter Homes. This approach is not supported by Government's own New Territories land policies.

An effective way of including private land owners in the development process must be identified so that good developments can proceed quickly. For some reason, there is no sense of urgency in Government to unlocking the development potential of these enormous areas of existing private land.

Wrong assumption (2) – Target population - Government's population target adopted in calculating the projected land needs is wrong. The figure being used is 9 million, taken from Hong Kong 2030 Plus, which has never been substantiated. In 2016, the Census and Statistics Department projected Hong Kong peak population to be 8.22 million in 2043, and thereafter to gradually decline, in line with an ageing population trend. Accordingly, the study is aiming to house 780,000 more people than is likely to be necessary. Adopting an average household size of 2.8, that translates into an over-provision of some 278,500 flats.

Residential plot ratios - Finally, I refer to comments made recently in the press by Roger Nissim of the Citizens Task Force on Land Resources who had identified that the residential plot ratios being proposed in the new development area are well below the maximum figure of 6.5 allowed under the Hong Kong Planning Standards and Guidelines. He has noted that by using the maximum plot ratio of 6.5 the number of new plots in Hung Shui Kiu, Kwu Tung North, Fanling North, Kwu Tung South and Tung Chung West can be increased from 180,750 to 240,800 – an increase of some 33 percent or 60,000 units.

Given the high fixed costs of land acquisition, clearance and relocation, followed by the site formation and infrastructure provision for these New Development Areas sites, surely Government has a strong responsibility to maximise the use of these new New Development Areas lands to ensure that we, the taxpayers, get the best value for our money and that the housing problem is properly addressed – without the need to unnecessarily develop country parks, golf courses or other creational land.

Yours sincerely,	

John A.H. Leigh

4. 意見:

建議發展屯門巴士轉車站的土地,如將小欖監獄設施搬到離島。因轉車站附近,地多人小,反對聲音比較少。

同時指出, 龍鼓灘至青龍頭一帶可以填海。之後, 再建設鐵路, 發展城市。 令一方面, 政府將厭惡設施, 如焚化爐、垃圾堆填區等, 都放置在新界西。 好的設施如, 文化劇院、科研建築等都沒有。市民認為政府應該對各區公平, 公平分配公共資源。

在土地不足的情況下,有低地積比建築,是由於交通基建不足,發展不到。 如有足夠交通基建,如現在發展中的元朗和西貢用地,可由1點幾的地積比, 提高到3至4倍。

市民找不到有關土地用途的資料,認為政府公開資料不足、透明度不高。舉例如:,哪些地會用作興建房屋、哪些地會規劃作商業用途等。

c/o The Hong Kong Policy Research Institute/Hong Kong Vision,

15 July, 2018.

Task Force on Land Supply, 17/F, West Wing, Central Government Offices, 2, Tim Mei Avenue, Tamar, Hong Kong.

Dear Sirs,

Land for Hong Kong: Our Home, Our Say!

Hong Kong should be most grateful to the Task Force for having done so much useful work on this very difficult, controversial but very important matter.

You have suggested that the public should respond to your request for views by completing a questionnaire. I have decided not to do this as I do not think the filling in of a questionnaire can reflect the reasons of the views of the respondents and I do not believe that a quantitative approach is appropriate in this type of exercises.

I sincerely hope that you will consider my responses in the attached "paper" and the reasons for my recommendations..

Yours sincerely,

Dr. K.S. Pun

(Principal Research Fellow, HK Vision/HK Policy Research Institute, Former Director of Planning)

LAND FOR HONG KONG: OUR HOME, OUR SAY! How to tackle land shortage?

Report of the Task Force on Land Supply

Responses of Dr. K.S. Pun

July 2018.

(Responses According to Section Numbers in the **Report**)

I. Background Aspects Discussed by Task Force

Section 1.1 Insufficient Land Supply leading to Imbalance in Supply-Demand

- A.1 Ever since its beginning as a city, Hong Kong has been suffering from the shortage of land for urban development. That has been the main reason for the extensive use of reclamations and slopes for housing and a multitude of other uses. Hong Kong could not have been developed into a major world city if we did not have the courage to adopt these very brave ways to solve our land shortage problem since 1842. Why have we now given up these very good methods?
- A.2 In early 1980s, the Hong Kong Government completed a major consultant study, namely the Study on Harbour Reclamations and Urban Growth (abbreviated as SHRUG). Applying physical and mathematical test models, it identified quite a number of possible environmentally-acceptable new reclamations on the two sides of Victoria Harbour. The Protection of Harbour Ordinance was later enacted, indirectly making it impossible to proceed with the identified reclamations within the Harbour, unless the court is convinced to allow a particular reclamation. The situation of land shortage was thus aggravated!
- A.3 Is the present land shortage problem much more serious than before? If it is, why? We can only hope to fully and effectively tackle the land shortage problem if we understand and if we are able to solve the problems which give

rise to the situation.

- (a) Population growth. [Our current population growth seems less rapid than in, for example, the 1960s and 1970s when very large numbers of people rushed into Hong Kong in a very short time before the "touch-base" policy and practice were adopted.]
- (b) Population policy. [Hong Kong now has a very low rate of natural population growth. The population increase appears to have been due to external inward migration from the Mainland and from overseas such as the return of its own migrated citizens. The nature, size and timing of these inward migrating groups are impossible to forecast to any degree of accuracy, giving rise to difficulties to plan for them. **Should Hong Kong adopt a population policy?**]
- (c) Housing policy. [Is it correct to adopt housing objectives such as zero sharing (i.e. each household in its own living-quarters), amount of space per person and home-ownership? Together, these objectives may increase the demand in the number of living-quarters and, hence, the land area. **Should we re-examine our housing policy?**]
- (d) Politics. [The effort in finding housing sites is rendered more difficult by such socio-political issues as demand for unobstructed views of existing residents and objection against land resumption.]
- (e) Environmental awareness. [Many objections against the use of some sites are based on environmental reasons which are regarded by many of their advocates as totally not negotiable. **Is this rational?**]
- (f) We have stopped using **slopes** for development. Why?

Should these problems be tackled in parallel with (eve if not before) the land supply issues?

Section 1.3 Increasing Land Supply: A Pressing Need

B.1 I agree that "we must not lose sight of the future and the needs of our next generation." I therefore strongly support the suggestion of setting up a land bank for the benefit of not only the next, but all future, generations. This bank has to be continuously replenished with new sites to replace sites allocated to meet new demands.

Section 2.1 Land Shortage is Much Higher than 1,200 Ha

- C.1 (i) <u>Housing land</u>. For the reasons outlined in the Report, I share the opinion that much more than the 1,200 ha estimated in Hong Kong 2030+ is needed.
 - (ii) <u>Economic land</u>. Being a free economy, Hong Kong has difficulties in predicting the demand of economic land with any degree of accuracy since so much depends on the world market which fluctuates greatly. Further, major international companies, for example, prefer to set up their headquarters in buildings with large floor plates and surrounded by very attractive external environment; these criteria are extremely difficult to meet in Hong Kong.
 - (iii) <u>G/IC</u>, open space and infrastructure It must be noted that the requirements for community and recreation facilities stipulated in the Hong Kong Planning Standards and Guidelines (HKPSG) are quite low compared to those in any other cities. Moreover, these standards do not take account of the needs of outsiders who, though may not be permanent residents of Hong Kong, also do need services from these community facilities.
 - (iv) As pointed out in past studies on the social effects of the very compact high-density development in Hong Kong, its residents must be supported by adequate supply of community and recreational facilities outside their overcrowded home to help to reduce the undesirable impacts of their immediate living environment. We must try our very best to improve the livability of Hong Kong – we must provide more than the minimum stipulated in HKPSG.

Section 3.2 Land Use Review

D.1 How many of these 200 odd sites are not required to make Hong Kong more livable? Most of them, other than some green belt sites, must have been designated in the town plans with a view to improve the quality of the environment. Their rezoning will therefore be detrimental to the living environment. We should not damage the environment in order to provide land for housing in a poor environment?

Section 3.3 Increasing Development Intensity

E.1 I do not know how the "20%" in the 2014 Policy Address has been derived.

- Nor can I understand why it can be applied generally throughout the Main Urban Areas and the New Towns and how it can be applied without upsetting the adequacy in the provision of community facilities and infrastructure.
- E.2 I would, nevertheless, suggest that such increases in development intensity can be considered at the more micro level site by site. An example is an investigation on how the recommendations in KDS could now be relaxed in some parts of Kowloon as some of previous problems may have now been at least partly overcome.

Section 3.4 Sites under STT, TGLA and Vacant Government Sites

F.1 These sites, though vacant on the day of survey, are **frequently very useful** and much needed. They provide land for works areas for the undertaking of many engineering and construction projects, such as the construction of major housing estates. Replacement sites are often very difficult to find. Great care, therefore, has to be exercised in deciding to transfer them to other uses.

Section 3.6 Better Use of G/IC Sites

G.1 I entirely support the idea of multiple-use of existing and future G/IC sites. However, past experience indicates that, due to the very different situations and needs of various Government departments and organizations (such as timing, location and availability of finance on time), it is most difficult to strike compromises regarding when and where to erect such buildings.

Section 3.7 Better Use of Industrial Buildings

- H.1 For the purposes of (a) finding land for housing, and (b) providing suitable land for the new industries in Hong Kong, studies should be urgently undertaken to decide on the future uses of land now occupied by industries and, as a corollary, to identify new industrial area(s). As a basis for this exercise, the Government should formulate an "industry policy".
- H.2 Some of the existing old industrial areas in Hong Kong, like Kwun Tong, San Po Kong and Tsuen Wan, are no longer suitable for existing industries, even less for modern ones. Consider the current problems in these areas: the road layouts which can hardly cater for today's large container vehicles; the traffic congestions; the low environmental quality; the design of the internal spaces

- not being suitable for our new industries (Industry 4.0 and soon Industry 5.0).
- H.3 The conversion of parts of existing factory buildings to other "non-industrial" uses would delay the conversion of the land these factories now occupied for housing development. In this connection, I suggest to **adopt the following approach which will "kill several birds with one stone"**:
 - (i) relocate the very out-dated Kwai Tsing container terminals to a new site with purposely designed modern berths and other facilities (including places to store and repair container boxes, hence doing away with some existing brownfield sites); and
 - (ii) reserve land in this new site also land for modern industries, thereby releasing land currently occupied by existing, old factory buildings in existing industrial areas for housing development.

This is related to Sections 5.1 and 5.11 (paragraphs P.1 – P.3 below).

Section 3.8 Reviewing and Streamlining Development Control Procedures

It is unfair and inappropriate to "criticize" PlanD, LandsD and Buildings
Department (i.e. BD) and them only. First, they are "professional"
departments which have their principles to adhere to in order to provide the
best possible for the community. Second, the laws of Hong Kong have
designated each of their Directors as the legal "authority". Third, many other
Government departments are also involved in dealing with projects – such as
those concerning with traffic, environment and utilities issues. A lot of time
and much effort have to be spent by these departments to work out
compromises (if any possible) between them.

Section 3.9 Urban Renewal

- J.1 The URA has adopted the 4R approach. Of these "Rs", only "redevelopment" can contribute to land supply and only indirectly. Through replacing old buildings with new, it makes more intensive use of precious urban sites, hence increasing the "accommodation capacity" of these sites. The number of residents looking for housing units is reduced, assuming the number of people the redevelopment projects kick out is smaller than the number they can accommodate.
- J.2 However, the effects of the diminishing plot ratio and KDS (mentioned in paragraph E.2 above) must first be overcome.

II. Options Considered by Task Force

Section 5.1 Developing Brownfield Sites

- K.1 Much "false" hope has been put on the possibility of using brownfield sites for housing development. There are at least the following problems:
 - (i) Most of the uses now found on brownfield sites are important for the economy and functioning of Hong Kong as a city. Therefore, they cannot be simply taken out from the existing sites.
 - (ii) With difficulties, some of these uses can be removed into specially designed buildings; some can never be. Replacement sites for the second group are, first, extremely difficult to find and, second, even if such sites are found, it means that other otherwise "clean" sites will be turned into brownfield sites.
 - (iii) Most of the existing sites are privately owned and are not properly served by infrastructure. Even if the existing uses are cleared, the sites may not be immediately ready for housing.

Section 5.2 Why Should We Explore Public-Private Partnership (PPP)?

L.1 I totally endorse the proposal to apply PPP where suitable. (Please read about the new PPP method proposed in the "Public Private Partnership for Land Provision" published by Hong Kong Vision of the Hong Kong Policy Research Institute in April 2018.)

Section 5.3 Alternative Uses of Sites under Private Recreational Leases

- M.1 As explained in paragraph C.1 (iv) above, given Hong Kong's high-density compact development, its people need the support of many and much of the G/IC facilities/services and open spaces outside their overcrowded homes. These facilities play an extremely important role. We should do the opposite to what the Report has proposed we should try to increase the provision of these facilities, not to convert their sites into housing land. In the urban areas in particular, replacement sites for these facilities are almost impossible to find.
- M.2 We should not provide housing in a poor environment.
- M.3 The main argument against keeping them, especially the land-extensive

- recreational facilities, is that they use up large areas of land for which they pay only small amounts of "rents" to the Government but their facilities are enjoyed by very few members. To counter this argument, perhaps the Government can consider raising their "rents" and demanding the opening up of their doors to more Hong Kong people.
- M.4 The golf course at Fanling is subjected to similar criticism. As a world city, Hong Kong must have an internationally well-known and up-to-standard golf course. The course is very well-managed and has adopted the "English style" way to beautify, using natural local grass, plants and trees, thus, unlike American-style courses, creating no adverse effects on the nearby environment. I therefore propose to keep it (and the whole of it) but, like other recreational facilities, it should be asked to pay much more "rents" to the Government and to open at least parts to the public on selected days in the week.
- M.5 Some have proposed to relocate this golf course to another site. However, even if such a site can be found, it will take a long time to build another equally attractive and high-standard course.

Section 5.4 Near-shore Reclamation Outside Victoria Harbour

- N.1 It is more than obvious from past experience that reclamation is by far the quickest and best way to produce land. In addition to the reasons outlined in the Report, the production speed and the future uses of the sites on reclamations are under the full control of the Government. (I understand from some engineers that the length of the production time can be mastered by engineering methods.)
- N.2 One main problem is to find suitable sites outside Victoria Harbour. I would suggest we should re-examine all the sites previously identified by the Government and in past studies.
- N.3 However, appropriate fill materials may not be available within the Territory. In the past, hill-slopes with the right materials were levelled (for development), at the same time producing fills for reclamation on the waterfront, thus forming two pieces of land in one engineering project. (Why is this method not used now?) If this method can no longer be used, we have to buy fill materials from outside.

Section 5.8 Developing Two Pilot Areas on the Periphery of Country Parks

- O.1 Other than being water catchments and ecological conservation areas, the country parks are the "lungs" of the highly urbanized areas. A map of the Territory shows beyond any doubt that no matter which urban development area one lives in, whether in the main urban areas in Kowloon and Hong Kong Island, in new towns or in the rural areas, one is very near to a country park. In urban planning, this is called the marriage of the town and the country. This is the noble planning objective very few cities, if any, can achieve. Hong Kong somehow has achieved this. Because of this, millions of people (including local residents and tourists) visit the country parks each year.
- O.2 Some have claimed that the country parks assist to reduce the "heat island" impact of the summer heat. Some others have suggested these parks make the atmosphere in Hong Kong more "refreshing" than in Singapore or Shen Zhen.
- O.3 As much of these parts as possible must be preserved. I recommend that, unless and until it is proved beyond any doubt that other housing sites cannot be found elsewhere in the Territory, we should not touch any parts of the country parks.
- O.4 Does this mean that the whole of the area under country parks is sacrosanct?

 If it can be proved that some small portions can be used for other worthwhile purposes without any detriment to the overall function of these parks, why can these portions be excised?
- O.5 Regarding to proposal to use some fringe areas of the country parks for housing, one must ask: who would like to live deep in the countryside?

 Instead, it may be more preferable to live in Shen Zhen!

Section 5.11 Relocation/Topside Development of Kwai Tsing Container Terminals

- P.1 In considering the future of the Kwai Tsing container terminals, the following information from logistic operators in Hong Kong and other experts such land administrators are relevant.
 - (i) The terminals are very outdated in many aspects: the berths being too short to handle modern large container ships, the operation being not automatic, the absence of rail connection, inadequate container box storage and repair yards, insufficient road connection and being surrounded by urban

areas.

- (ii) For these reasons, unless Hong Kong decides not to have container terminals from now on, we need completely new and well-planned terminals outside the urban area.
- (iii) The sites now occupied by the terminals and their nearby ancillary facilities have a total area of about 400 ha and together they are a piece of valuable urban land in the middle of Tsuen Wan. It can be a piece of very useful housing land.
- P.2 Unless Hong Kong has decided to do without container terminals forever and to stop being a marine port, we must build modern terminals on a new site perhaps on an artificial island in the Central Waters.
- P.3 The topside development over the terminals will render it difficult, probably impossible, to undertake improvements to the existing terminals (which means that the future of the our international marine port is doomed). Those living in the houses on the platform over the existing terminals will suffer from strong lights and high-pitch noise from the operation of the terminals 24 hours a day.

Section 5.12 Reclaiming Part of Plover Cove Reservoir for New Town

- Q.1 Knowing that there is a water shortage in the Mainland, a situation which is likely to become worse, we should know that it is too much a risk to reduce the total water storage capacity of the reservoirs in Hong Kong.
- Q.2 Further, this is a very beautiful countryside within a country park. The area around that reservoir is a very popular picnic site.

III. Recommendations

- R.1 Based on the points discussed in the above paragraphs, of the 18 options listed in the Report, I can support the attempts to identify housing land from the following:
 - (1) brownfield sites;
 - (2) agricultural land in the New Territories;
 - (3) near-shore reclamations;
 - (4) East Lantau Metropolis;
 - (5) caverns and underground space;
 - (6) more development areas in the New Territories;
 - (7) river trade site;

- (8) over transport infrastructure;
- (9) potential of public utilities sites; and
- (10) relocation of Kwai Tsing container terminals.
- R.2 Since we need housing land extremely urgently, since every one of these possible options will take time to complete and because none of them can produce all the land we need, I cannot see why they should be prioritized and how they can be prioritized rationally. Therefore, I recommend that they should all be proceeded with immediately.
- R.3 Due to reasons discussed above, I recommend that the following options should not be proceeded with:
 - (i) land under private recreational leases (paragraphs M.1 M.3);
 - (ii) Fanling Golf Course (paragraphs M.4 and M.5);
 - (iii) pilot areas on the fringe of country parks (paragraphs 0.1 0.5);
 - (iv) topside development over the Kwai Tsing Container Terminals (paragraph P.3); and
 - (v) reclaiming reservoir (paragraphs Q.1 and Q.2).
- R.4 At the same time, perhaps **studies should be undertaken regarding:**
 - (i) best possible way to apply PPP;
 - (ii) replacement site to build an internationally acceptable golf course;
 - (iii) more slopes suitable for development;
 - (iv) possible parts of the country parks which can be excised for other uses without detriment to the ecology and conservation; and
 - (v) other sources of new land for housing and for the building up of a land bank (in addition to the options discussed in the Report.

45	AGRICULTURAL LANDS vs FANLING GOLF C	OURSES (2)
1	to: tfls@devb.gov.hk	16/07/2018 15:17

RESEND

From:

Sent: Monday, July 16, 2018 2:59 PM **To:** The Secretariat (-tfls@devb.gov.hk)

Cc:

Subject: AGRICULTURAL LANDS vs FANLING GOLF COURSES (2)

The Secretariat
Task Force on Land Supply
Central Government Offices
Hong Kong.

Dear Sirs,

Further to my earlier email, I would further suggest you consider with priority to make use of the agricultural lands instead of the golf courses for immediate housing for people in Hong Kong.

Agricultural lands are spread all over the New Territories, idling for very long times with small ponds and drainages to feed worms and mosquitos; piling up muddy domes and wild grasses to cause lots of hygienic problems. The slowdown for land conversion is because of political noises yelling 官商勾結, which can be compromised for benefits of all concerned.

All these lands are mostly owned by developers, who are reasonable people to deal with. If you can work out a formula, say the developers surrender 20/30% of their lands to government for public housing, the authority would compromise for a reasonable land conversion price for them to dig up the land for building. This will be a win-win-win situation for the government that people can have a quick chance to choose to buy their home through the private sector or for public housing.

This may take 2-3 years to convert the waste lands into useful lodging, instead of "destructing" the valuable golf courses, which are the proud heritages of Hong Kong.

With high respect to you all working hard for the welfares of Hong Kong,

Sincerely, Nelson Lee Member of Hong Kong Golf Club.

AS .	Land Supply in Hong Kong		
The same	to: tfls@devb.gov.hk		16/07/2018 13:40

Dear Sir/Madam.

I am a member of the Royal Hong Kong Yacht Club and water sports lover. I would like to share with you how important the Club is to the development of watersports in Hong Kong, including sailing, rowing, paddling and dragon boating. Over the last 170 years, the Club has been instrumental in promoting these sports to the local community, nurturing future talent, and organising and hosting local and international racing events throughout the year. All of these contributions to Hong Kong are facilitated by the fact that the RHKYC has a PRL. Many have already enjoyed the facilities and training provided by RHKYC and I am sure you understand my concern about the impact of the two consultations on the Club's future.

Our sport gives relief to the busy, hectic, lives of the people of Hong Kong. Many doctors, lawyers and other professionals take a sail in our waters to relief the stress of their busy work. Young people are encouraged to crew on boats for free, as are members of the public.

The RHKYC is run by volunteers who contribute their time to club and to sports management. Without these volunteers, it will not be one of the very best yacht clubs in the world.

The RHKYC has three Private Recreational Leases. All three are not suitable for building housing estates. Kellett Island is a historic site. It has so many tunnels running under the Club that tall buildings cannot be built there.

Middle Island has no road access. Shelter Cove is at the end of a very narrow road. It cannot handle the traffic of more development.

Yours truly,

Best regards Gaston Chan Gaston Chan Mobile:

Chan 對土地供應選項及相關議題的意見

to: tfls@devb.gov.hk 16/07/2018 23:22

請停止研究開發郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正落實可持續和以人與生態為本的發展規劃。

祝 安好!

Chan 謹啟

(1)		or development	Land Supply - Country	Parks should never 16/07/2018 17:54

For the HKSAR Government's Task force on Land Supply

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Winnie POON

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局必須首 先善用棕地,及私人遊樂場地契約用地,釋放現有的土地資源。

當局不應發展郊野公園邊陲地帶(不論是作為中長期選項的兩個試點,或作為概念性 選項),亦不應在維港以外近岸填海及發展東大嶼都會,對於發展農地也須謹慎處理, 因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。

本人希望土地供應小組向政府反映本人意見,保護香港的自然環境。

祝 安好!

優先發展棕地,無須發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府應先用好棕地資源,及私人遊樂場地契約用地,因為粉嶺高爾夫球場和棕地等已 經 足以應付香港未來的房屋需求。

政府不應發展郊野公園兩個試點作為中長期選項,不應研究郊野公園邊陲地帶其他地 點,亦不應考慮在維港以外填海,因為填海將破壞海洋生態。

請黃遠輝先生為香港下一代著想,不要開發郊野公園邊陲地帶。 謝

謝!

Tammy Hackman's suggestions on Land Supply - Country Parks should never be an option for development					
	to: tfls(•	on.	16/07/2018 10:16	

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Tammy Hackman

優先使用棕地,守護自然郊野及郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 棕地和私人遊樂場地契約用地,必須被選為優先選項,這將有助釋放土地資源。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

本人期望土地供應專責小組能真的能保護我們的環境,也能讓市民安居樂業。

祝願 閣下生活愉快!

21 June 2018

Secretariat, Task Force on Land Supply 17/F, West Wing, Central Government Offices 2 Tim Mei Avenue Tamar, Hong Kong

Dear Secretariat,

In reply to your public consultation exercise, I am writing to object to both the partial development option and the full development option of the Fanling Golf Club.

Hong Kong Golf Club is an important green lung in the northern New Territories; over 40%, or 74.2 hectares, of the Fanling courses are comprised of dense woodland, including secondary forest. The Fanling courses have many trees which are protected by Hong Kong law and meet the Government's criteria of "Old and Valuable Trees". The three courses are also inhabited by a huge diversity of fauna including protected species of birds, insects, reptiles and other wildlife.

There is a real shortage of land supply but development of the Fanling Golf course should not be considered.

Sincerely,

Tsang Hing Lam

土地供應專責小組

黃遠輝主席:

你好,我們是土瓜灣社區家長關注組,成員來自基層家庭的家長,對於土地供應專責小組現時的公眾諮詢,我們希望政府不要拿基層做擋箭牌,又說沒地又是找地、又是問卷調查又是填海,請問填海以後的那些土地會給基層建公屋嗎?填海之後幾年可以建公屋?是5年還是10年?是解決現階段的房屋問題嗎?

政府不要官商勾結,利字當頭,現有的土地如高爾夫球場即時起就可以解決幾十萬的基層住屋問題。還有一些閑置空地,有的都荒廢了 10 多年,就如土瓜灣海心公園旁就有一大塊空地,政府就是讓它閑著十幾廿年,但另邊廂又話有土地荒。市建局在舊區收回不少地,土瓜灣都有很多被收的地段,但之後起出來的都是豪宅,政府如果真心想解決基層住屋問題,可以透過舊區重建給基層直接起公屋,不用大費問章去填海。

希望黃遠輝主席會如實記錄我們小組的意見,謝謝!

土瓜灣社區家長關注組

聯絡人: 方炎玲

地址:

香港添馬添美道 2 號政府總部西翼 17 樓 土地供應專責小組 黃遠輝主席:

你好,我們是「土瓜灣基層租客關注組」全體組員,居於九龍土瓜灣的基層街坊,對於土地供應專責小組尋地造地,我們有以下意見:

- (1) 政府不應為咗千幾個高球會會員而唔捨得拿出高爾夫球場,放棄 20 幾萬的香港基層人仕住屋需要,一塊粉嶺高爾夫球場咁大塊地已經可以起很多公屋。現地現拿現起,點解政府要做填海咁費時費錢嘅大工程,政府填9個海十年後有沒有一個係拿來起公屋的,現時新建公屋有哪一個是對住海景的?所以政府應收回高球場建公屋。
- (2)借解決現時住屋的需要為名,不斷的填海。係咩真嘅可以解決住房問題? 政府根本有很多地,不過沒有善用,只要用『收回土地條例』便可以收回 不少閒置地來解決住房問題。
- (3) 政府有地唔起公屋,拿去賣給房地產商,根本就解決唔到民生住房問題。
- (4) 香港有很多地,請善用閒置校舍\宿舍做過度性房屋。
- (5)對於政府自己(特首)帶頭破壞現有的咨詢機制,出口術要填海造地,唔等 諮詢報告,作為香港人表示遺憾。
- (6)香港基層人士有話事權,長官意志閉門造車,恐怕政府今次的土地諮詢尤如先前的『全民退保』,就係「前車之鑒,唔聽民意!」

希望正如黃遠輝主席面對傳媒所言,不會黑寫成白,會如實記錄我們小組的意見,謝謝!

Secretariat, Task Force on Land Supply 17th Floor, West Wing, Central Government Offices 2 Tim Mei Avenue, Tamar, Hong Kong

16th July 2018

Dear Sir/Madam,

I write to express my view that I am strongly against the idea of redeveloping, whether the entire or a portion of, the Hong Kong Golf Club ("HKGC") in Fanling as a way to come up with new land for the construction of public housing. Whilst I understand the need for more public housing in Hong Kong, that need, however, should not come at the expense of sports or the environment.

The HKGC has been a key supporter of the Hong Kong Golf Association ("HKGA") in the grooming of young talent by providing HKGA free access to host its squad team training and amateur tournaments. The Fanling courses are also the venues for the Hong Kong Open which is the oldest professional sporting event in this city. The facilities at Fanling are open to the public from Monday to Friday throughout the year. Based on HKGC's statistics, in 2017 over 50,000 (42%) of the 120,000 rounds of golf were played by non-members. I am of the view that Hong Kong needs more, rather than less, sporting facilities.

As far as the environment is concerned, HKGC is an important green lung in the northern New Territories. The Fanling courses have many trees which are protected by Hong Kong law and meet the Government's criteria of "Old and Valuable Trees". The three courses are also inhabited by many protected species of birds, insects, reptiles and other wildlife. I believe Hong Kong needs more, rather than less, trees and open spaces. If you think about it, the arguments for preserving the country parks are equally applicable to the preservation of the Fanling golf courses.

As an alternative, I strongly suggest the Task Force to look into reclamation as a more effective and sustainable way of boosting Hong Kong's land supply for the years to come.

Yours truly,	
D' V Design

優先使用棕地,守護自然郊野及郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局必須首 先善用棕地,及私人遊樂場地契約用地,釋放現有的土地資源。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因 為我們不能犧牲郊野公園的重要生態和生物。

本人期望土地供應專責小組能真的能保護我們的環境,也能讓市民安居樂業。 萬分感謝!

政府必須停止研究發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府應先用好棕地資源,及私人遊樂場地契約用地,因為粉嶺高爾夫球場和棕地等已 經足以應付香港未來的房屋需求。

當局不應發展郊野公園邊陲地帶(不論是作為中長期選項的兩個試點,或作為概念性 選項),亦不應在維港以外近岸填海及發展東大嶼都會,對於發展農地也須謹慎處 理,因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。

衷心希望土地供應小組接納意見,要求政府改善規劃,保護珍貴的自然環境。 萬分感謝!

優先發展棕地,無須發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府應先用好棕地資源,及私人遊樂場地契約用地,因為粉嶺高爾夫球場和棕地等已 經足以應付香港未來的房屋需求。

政府必須停止研究發展郊野公園邊陲地帶兩個試點及其他邊陲地帶,亦不應考慮兩個 涉及維港以外填海的中長期土地選項,農地發展亦須小心看待,因為郊野公園是香港 市民難得的呌氣地方。

本人希望土地供應小組向政府反映本人意見,保護香港的自然環境。

順祝 生活愉快!

土地供應的選項不應包括郊野公園邊陲地帶和填海

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

政府必須停止研究發展郊野公園邊陲地帶兩個試點及其他邊陲地帶,亦不應考慮兩個涉及維港以外填海的中長期土地選項,農地發展亦須小心看待,因為郊野公園是香港市民難得的呌氣地方。

希望土地供應小組聆聽民意,促請政府改善規劃,令市民真正安居樂業。

順祝 國泰民安!

土地供應的選項不應包括郊野公園邊陲地帶和填海

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

衷心希望土地供應小組接納意見,要求政府改善規劃,保護珍貴的自然環境。 萬分感謝!

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

- 政府應優先發展棕地,有研究已經指出,香港的棕地及粉嶺高爾夫球場等已經足以應付香港未來的房屋需求;
- 郊野公園及其邊陲地帶以及填海都不應該成為土地供應的選項(不論是短期、中長期或概念性選項),其他的自然土地資源(如農地)亦應謹慎看待。因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。
 - 請特區政府勇謀兼備,處理新界存積已久的土地規劃不公問題。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正 落實可持續和以人與生態為本的發展規劃。

順祝 台安!

土地供應的選項不應包括填海和郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 棕地和私人遊樂場地契約用地,必須被選為優先選項,這將有助釋放土地資源。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

本人希望土地供應專責小組虛心接受市民的意見,無須開發郊野公園邊陲地帶。

順祝 國泰民安!

先用棕地,糾正規劃問題

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 棕地和私人遊樂場地契約用地,必須被選為優先選項,這將有助釋放土地資源。

當局不應發展郊野公園邊陲地帶(不論是作為中長期選項的兩個試點,或作為概念性 選項),亦不應在維港以外近岸填海及發展東大嶼都會,對於發展農地也須謹慎處 理, 因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。

請土供組回應香港人的訴求,優先發展粉嶺高球場,解決基層上樓問題。

順祝 生活愉快!

		d's suggestions or or development	n Land Supply - Country Pa	arks should never 17/07/2018 15:12
From:	То:	tfls@devb.gov.hk		

For the HKSAR Government's Task force on Land Supply

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Hilary Garland

政府必須停止研究發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府必須優先使用棕地和私人遊樂場地契約用地,有研究已經指出,香港的棕地及粉 嶺 高爾夫球場等已經足以應付香港未來的房屋需求。

當局不應發展郊野公園邊陲地帶(不論是作為中長期選項的兩個試點,或作為概念性選項),亦不應在維港以外近岸填海及發展東大嶼都會,對於發展農地也須謹慎處理,因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。

本人期望土地供應專責小組能真的能保護我們的環境,也能讓市民安居樂業。

祝 安好!

- 就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:
- 政府應優先發展棕地,有研究已經指出,香港的棕地及粉嶺高爾夫球場等已經足以應付香港未來的房屋需求;
- 郊野公園及其邊陲地帶以及填海都不應該成為土地供應的選項(不論是短期、中長期或概念性選項),其他的自然土地資源(如農地)亦應謹慎看待。因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。
 - 請特區政府勇謀兼備,處理新界存積已久的土地規劃不公問題。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正 落實可持續和以人與生態為本的發展規劃。

順祝 台安!

		er's suggestions o or development	n Land Supply - Country	Parks should never 17/07/2018 11:42
From:	То:	tfls@devb.gov.hk		

For the HKSAR Government's Task force on Land Supply

- I feel very strongly that Hong Kong should not develop its country parks and am hereby submitting my feedback for the Task Force on Land Supply's public engagement as follows:
- The government should absolutely prioritise the development of brownfields. Studies have shown that there is more than sufficient land from brownfields to meet Hong Kong's housing needs;
- Country parks and their peripheries, as well as land reclamation should never be an option for development (whether short-term, mid-term, long-term or conceptual). Other areas of natural resources (such as farmland) should also be approached with extreme caution because these options will cause irreversible harm to Hong Kong's environment and natural resources;
- I earnestly request the SAR government to take a bold step forward and finally resolve Hong Kong's enduring and unjust land-planning problem.
- I kindly request the Task Force on Land Supply to convey my views to the government departments responsible, so that Hong Kong can pursue a land development model that is sustainable, has integrity and will benefit everyone.

Sincerely yours, Sandra Hacker

Secretariat, Task Force on Land Supply 17/F, West Wing, Central Government Offices 2 Tim Mei Avenue, Tamar, Hong Kong

Subject: The importance of preserving the entire Fanling Site of HK Golf Club

Dear Sir/Madam,

As a member of the HK Golf Club (HKGC), I am strongly against the HK Government to consider reclaiming the fanling golf courses for increasing land supply in Hong Kong. In Hong Kong, we rarely have any green lung in the northern New Territories which comprises of dense woodland, including secondary forests as well as "Old and Valuable Trees" which are protected by Hong Kong law. There are also protected species of bird, insects, reptiles and other wildlife inhabited in these three courses which both have integral ecological and conservation value.

Moreover, I know that the club has been a key supporter of the HK Golf Association in the grooming of young talent by providing free access to host team training and amateur tournaments. This encourages the love of sport and young golfers to participate in the tournament hosted by HKGC. Playing the tournament has enabled Hong Kong's talented young amateurs to earn world ranking points to help them to qualify for international events including The Olympic Games.

In summary, this historical piece of land serves several valuable and significant purposes apart from the reasons stated above. I really appreciate HK Government not to consider this Fanling site as an option to solve land shortage.

Yours sincerely,

Chan King Tin, Thomas

Copy:

11th July 2018

RE: Against the reclaiming of land from The Hong Kong Golf Club

Dear Sir/Madame,

I am writing to express my disagreement of reclaiming of land from The Hong Kong Golf Club (HKGC). As a proud citizen of Hong Kong and a parent, I truly believe that integrity of the entire The Hong Kong Golf Club site is of paramount to secure Hong Kong as one of Asia's best cities. Furthermore, it remains a valuable resource for the protection of heritage, ecological conservation, the development of golf and contribution to the community at large.

Please allow me to take this opportunity to highlight that HKGC is the oldest golf club in South East Asia and the clubhouse at Fanling was constructed in 1911 and is a Grade II Heritage Building not to mention that there are 68 ancestral graves dating back several hundred years to the Qing and Ming dynasties.

From an ecological and conservation of environment point of view, over 40% or 74.2 hectares of the Hong Kong Golf Club are comprised of dense woodland including secondary forests. Among them, many are protected by Hong Kong law under the Government's criteria of "Old and Valuable Trees." HKGC is also inhabited by a huge diversity of protected spices of birds, insects, reptiles and other wildlife.

Despite many people believe that HKGC is a private club refusing public access, which is a complete misconception as the facilities of HKGC is actually open to public from Monday to Friday throughout the year. In 2017 a one over 42% of the 120,000 rounds of golf were played by non-members. HKGC is also a keen supporter of the Hong Kong Golf Association (HKGA) in the grooming of young talented players by offering HKGA free access to host team training and amateur tournaments.

In addition, HKGC hosts the annual Hong Kong Open which is Hong Kong oldest professional sporting event. This event is co-sanctioned by the European and Asian PGA Tours and is one of the only two professional tournaments in the world to have been hosted at the same venue for more than 50 years. In 2017, HKGC welcomed over 48,000 spectators including 10,000 international visitors not to mention that it is broadcasted worldwide to over 400 million households.

HKGC has also been making a notable contribution to the community. Over 200 non-member events, including fund-raising charity golf days are being held each year. You should know that over HK\$20 million is raised annually for a variety of charities such as Community Chest, the Tung Wah Group of Hospitals, the Yan Chai Hospitals just to name a few. The HKGC also hosts an annual inhouse charity event, the "Cup of Kindness" which was launched over 30 years ago and all funds raised are being donated for community-based charities in North District including the North District Hospital.

I hope that it goes without saying that The Hong Kong Golf Club is indeed a valuable partner for protection of heritage, ecological conservation, the development of golf and contribution to the community. I once again strongly urge you to protect the integrity of the entire Hong Kong Golf Club site.

Sincerely,

Esquire, IP: 24886 via Land Der. Adr. Comitte Chan 我们提到我就新客件州(Peng Cham) 之后南部之五核山"Fire Finger Hill" 下文帝沿年一新 村(Nam Wan Sun Chuen) i 教意其後,至支持州 B毛爱州 数份望接受起

17 July 2018

To Whom It May Concern,

Submission regarding Land Supply in Hong Kong with particular reference to The Hong Kong Golf Club

I request you to please accept this submission in relation to the Government's initiatives to address the very pressing issue of land availability in order to tackle the critical housing shortages in Hong Kong through its Task Force on Land Supply public engagement, "Land for Hong Kong: Our Home, Our Say".

As a Member of the Golf Club since October 2017, I express my views only as a concerned member of the community.

Of all the Government's suggestions, the redevelopment of Fanling Golf Course is possible the most contentious and has, fairly or otherwise, generated much heated public debate where emotion has sometimes superseded any rational discussion.

In my view, redeveloping the Golf Course is an extremely short-sighted measure, which in reality does not really tackle both the issue of land supply and shortage in housing. Instead, it offers a minimal response to both issues that does not actually find a solution to the housing problem..

Furthermore, redeveloping the Golf Course might also open a can of worms that will again distract the Government from its original focus. It has the potential to give rise to the scenario where lands from other private clubs might be up for grabs, causing further upset in the community. From where else can land be seized back for development? There will be no end to this process if not handled sensibly and calmly.

.../2

Fel: (852) E-Mail:

Rosanna Wong Phd, DBE, JP

-2-

Redevelopment costs of the Golf Course will be substantial. This will include preparation of the land to ensure that it has been adequately drained and prepared for laying appropriate foundations and pilings. Also required will be infrastructure to ensure that the adequate electrical and water infrastructure will be provided.

Given the numerous governmental departments that will be involved in ensuring all compliance issues are met to the highest standards will take time, further exacerbating a problem that requires immediate attention. Thus, expense and length of process seem, in my opinion, two basic factors that make the redevelopment of the Golf Course an untenable option.

But what about the Fanling Golf Course in fact?

You are well aware of the long tradition of golf in Hong Kong. From the founding of The Royal Hong Kong Golf Club in Happy Valley in 1889 to the course in Deep Water Bay in 1898, the Fanling Golf Course was constructed in 1911, once the Kowloon-Canton Railway line made the area more accessible. The current 18-hole Old Course is now the second oldest golf course outside Scotland, after the Royal Calcutta Golf Course in India.

Beyond the golf links, there are according to official records, 68 ancestral graves and more than 74 urns located throughout the site, some of which date back to the Qing and Ming dynasties. It is said that one grave has been dated to being more than 450 years old. Furthermore, the graves represent the burial site of the five clans of indigenous villagers that are still resident in communities surrounding the Club.

This is not just the Golf Course's *Heritage Value*, it is a heritage that belongs to Hong Kong.

.../3

Tel: (852) E-Mail:

Rosanna Wong PhD, DBE, JP

- 3 -

It is estimated that nearly two-fifths of the Course is occupied by forest, with more than 30,000 trees on site. Tree Specialists have also estimated that about 160 of those trees could be registered as Old and Valuable Trees, such as incense trees, banyan, yellow cow wood and Chinese Holly. The Course also includes woodlands which add its quality as an environmental green space in urban Hong Kong.

This is not just the Golf Course's *Environmental Value*, it is the ecological value to the New Territories.

Golf is a game that is played the world over and in an article published just last year, makes the following point succinctly: "Golf may be a game firmly rooted in tradition, but it continues to evolve. So too do the measures of participation within the sport." This is true not just for the United States, but around the world, Hong Kong included.

Therefore, in order to ensure that public participation continues, both in terms of participants as well as spectators, we must remember that the Club's investment brings about economic and social value beyond the golfing community. In fact, the Club spends more than HK\$7 million to sponsor the Hong Kong Open tournaments, which bring in championship players and thousands of spectators.

This is not just the Golf Course's *Economic and Social Value*, but the added value for Hong Kong as a destination for business and leisure.

Hong Kong is facing an acute land supply and housing shortage issue. What is needed now is an overall strategy for the city's future development. As Professor Richard Wong so succinctly put it in his articleⁱⁱ

Even using public resumption to develop only small tracts of land in public housing is difficult because it could lead to less efficient land use and a lack of coordination of overall development. What happens if a specific plot ends up as a private development?

.../4

Rosanna Wong PhD, DBE, JP

-4 -

Therefore, simply assuming that the Golf Course in Fanling has land available for housing, it does not follow on that this will in any way address the crux of the issue: the shortage of public housing. I therefore have to conclude by reiterating that the re-using of existing land, which is functional, popular and efficient, is not a sustainable option. It is a short-sighted measure that is slowly turning into a political football, causing distraction from the real issue of finding a long term solution to an issue that does cannot be content with a simple band-aid response.

Thank you.

Rosanna WONG Yick-ming

房屋建議

您好!

我有以下建議有關房屋長短期政策,希望可以幫到你的施政,造福香港。

- I. 長期房屋政策
- (a)贊成填海造地,過去幾十年證明行之有效。
- (b)反對更改郊野公園用地作房屋用地,郊野公園應作為香港市民休閒功能。
- (c)反對收粉嶺Golf球場。因香港是國際城市,體育運動場地不能缺少。從運動得出的經濟效益也不少。
- (d)收棕地引起安置問題。棕地上的經濟活動影響香港其他經濟活動,需要長時間處理。
- (e)反對福利團體(如社聯)不務本業,參與房屋事務(臨時組建屋)日後洐生更多問題。

II. 短期房屋政策

在18區每年興建1-3座樓宇,供應約600-900單位(全年約有10000個單位供應),面積500呎,兩房單位供公共屋邨住户購買,政府以建築成本價出售,規限轉售年期不少於15年。價錢約400萬以下。騰出的公共屋邨單位供輪候人士。

因發展規模比較細少,覓地容易,配套已經存在。

初步計算如2019年落實興建,3年內(即2021年可落成第一批房屋(約1萬個單位),第2022年落成 10000個單位,特首在任期內(連任)可落成7-8萬個單位,同時也騰空額外公屋單位7-8萬個供分配 公屋供輪候人士。

短期房屋政策只影響公營房屋,對私樓樓價沒有太大影響。不會影響金融體系。

提議希望對舒緩房屋供應有幫助。

潘新

You may have time to read the following, prepared for Business Professional Federation: Member Comments on SCMP/BPF Opinions following lunch meeting June 22nd 2018.

Seems to me a realistic out of the box approach, if you agree please do with it what you will. CE is seeking public views, I have copied to her office.

See you again when time permits

James

Introduction

I support the viewpoints made by other Members in particular the point by Christopher To, that Increasing land supply will not solve our housing problem if other aspects are not tackled. Affordability is an important issue as he states, also that research data is necessary to support our arguments. Affordability is an important issue, a point that I entirely agree with. Also his point that the government should look for bold options. At this time I do not support an island approach, but it is a fact that HK does have adequate seabed to support a vigorous programme of affordable homes.

Reclamation on which to build much needed homes is an obvious practical choice, but apart from objectors campaigning on the grounds of environmental damage, it may not be the most cost effective use of seabed, nor the one that could deliver homes in a timely manner. Objections and construction time taken into account. The island concept mentioned by Mr To or the use of the Sha Tau Kok area by Mr Chu Kap, Ning are both practical but likely to be very long term solutions on today's political stage. Furthermore Hong Kong residents may not wish to be marooned away from everyday life, remembering public concern when the New Towns policy was first promulgated, on the grounds of so called remoteness from there then surroundings (unsatisfactory as they were).

As well as the need to house those without a home or seeking a first home, there is a further problem, the growing need to replenish and renew existing housing stock.

HK as at end 2018 had 1100 private housing units older than 60 years, and 315,193 older than 40 years. The poor conditions in which many of the elderly find themselves, and the unsatisfactory social problems arising from replacement needs, are urgent and demanding issues in there own right.

Mr Luk points out that supply cycle is much longer than demand cycle. In Hong Kong the primary market supply is on average 20,000 units, and short term demand/supply is filled by secondary market supply.

His key point is that increasing new supply of private housing alone may not reduce price, but revitalising total supply (primary and secondary) would.

Critics argue that land for private housing can be found, but because Government does not hold a land reserve, land is not readily available for public housing. The writer notes however that Hong Kong has coastline which could be developed in one way or another.

There seems reason to further explore the use of coastline for permanent homes, or as a land reserve, until improvement of existing or new housing stock ,meets the demand for homes. Also to enable the public at large greater access to that coastline. A letter from the writer appeared recently in the SCMP. Task Force Report

Use of seabed is recognised in the April 2018 report by the Task Force on Land Supply (the 2018 report), with the statement on p53 "unlike other land supply options, reclamation does not have a major impact on existing land use, and generally does not require private land resumption or household resettlement's. In addition, reclamation is a means for building land reserves to meet the ever changing needs of society."

The report goes on however to raise issues such as cost of development using reclamation, also the possibility of offshore construction work affecting water quality or fishing activities. Likewise the long lead time from initial planning to realisation. Statutory procedures and the necessary engineering studies, are noted as normally taking "a decade or more to complete".

The writer believes that use of seabed alongside existing coastline infrastructure, for example alongside the Airport road /rail expressway on Lantau after the bridge crossings, should be studied as a possible engineering approach which could provide affordable homes, whilst at the same time open up the seafront for public esplanade purposes.

Where the general nature of the surrounding environment has already been changed by coastline infrastructure, public concern about access and view corridors might be easier to address. However, I suggest that rather than use seabed by way of reclamation, alternative use by way of a shoreline platform just above sea level supported by piles from the seabed, is feasible. This approach might offer the possibility of shorter statutory procedures and environmental process, since the impact on the seabed and shoreline could be minimised, and opening up for public use alongside homes in the public sector, would be a favourable consideration. As a land reserve, platform use need not be a permanent solution, and the original shoreline could be restored when the land reserve can be replaced in due course, by land from elsewhere.

Affordable Esplanade Coastline Homes (AEC homes)

The concept is straightforward. Rather than reclaim for public housing high rise development, ADOPT a platform based ribbon layout for 6 to 8 storey homes, ribbon blocks with light wells and rooftop esplanade sea view, green roofing for residents or the public. Same roof level linked blocks, four rows of homes 1-2-1, light and ventilation space between rows for separation, the two spaces also for vertical/ horizontal access arrangements for residents, guests and emergency services.

Avoiding fill, use platform above sea level and piling (that would otherwise be required for homes if built on reclamation) for supporting the platform and homes together. Platform construction by modular units open rather than solid slab. Visualise a cruise ship typical deck, with outer cabins each side or the ship, and two rows of inner cabins, a companion way serving each row of outer and inner cabins, allowing occupants to walk to lift/stair access for upper and lower deck levels.

At platform level, provide for services/ people mover longitudinal transport needs, (automated people mover alongside other automated services, and emergency services, seems feasible). Water and sewage pipe runs under the deck is the conventional approach, but automated water craft for

collection and disposal using sea access and marine located collection points, might also be considered.

Modular construction with marine heavy lifts and factory production, each home unit delivered virtually complete including factory interior fit-out. Use of compressed laminated timber for home modules, proven safe for residential purposes, offering lighter weight, improved insulation and less maintenance in a marine location. Saving in weight compared with traditional home construction, would be a favourable consideration.

Quality and trouble free final home units, using digital engineering/architectural three dimensional management and information production techniques (BIM), are feasible and would result in cost and time savings.

Homes would face into the two (companion ways) for light and ventilation purposes, facilitating safety and convenience, also emergency services. Suggested that both land and seaward elevations should each be solar collector/green wall for appearance, providing good protection in the event of adverse weather, possibly with limited fixed (porthole type) glazing for natural light.

Wind (possibly wave) and solar energy, collected for use by the development as part of the energy needs for systems to provide central hot water and chilled water for cooling. All homeswould be ventilated with fresh air drawn in from above the roof esplanade level.

The roof level esplanade would be designated a public area, allowing more public access to the coastline than present alongside use by residents. Security measures for homes would be enhanced using 5G digitised facial recognition.

Opportunity

Total coastline around HK is 1178km., of which 187 km is developed. Affordable homes each possibly 6x12m gross footprint, and six levels (30metre platform to roof inclusive service levels) might be planned on basis of 1600 homes per kilometre.

Total potential number of homes for developed coastline alone is: 187x1600 = 299,000 homes

Sufficient number to meet need for decanting and re-place all existing homes older than 40 years, in a single programme. Obviously would not be planned as a single programme.

Simply to replace those homes older than 60 years, would only require about a kilometre of coastline, for example along the airport expressway approximately 10 km. of seawall is available.

A trial scheme would be prudent, say 3500 homes (two kilometres) perhaps under the watchful eye of Housing Society with their experience of low rise mixed use home blocks. However, setting up a factory for modular production would be a heavy initial investment. Modular home units from overseas shipped on Container. Vessels, might be feasible.

Occupancy

Question of willingness to occupy homes above the sea, especially concern that times of typhoon conditions would be greater risk than homes on land, also needs public consultation. Given appropriate engineering design of the homes such that exposure risk is minimised, occupants of the low rise inward facing blocks

would be no more exposed than high rise point blocks along a shoreline. The outside elevations of the ribbon development could be used for solar/wind energy capture, and/or vertical greening retaining some of the coastline appearance. Homes could be entirely in the public rentable domain, single or double occupancy especially new couples. Apart from the rooftop esplanade, resident open use recreation and service facilities would be features in the planning of the ribbon layout design.

Construction

Design of the platform would use the coastline for horizontal support, against wind loading or impact from waves or boats. Pile support for the platform and the homes above drilled into the seabed deposit, bearing on rock or equal load bearing layer. Platform structure fabricated elsewhere on shore in module elements, by water to the required location and placed by marine plant. Access from the coastline would be minimum, if at all.

Possible that platform units might be floated into position onto prepared sea bed foundations.

Home modules placed by marine plant, slide if necessary into final position, after fabrication and fit-out elsewhere.

Anticipated that daily necessities delivered to door, ordered online, but some retail outlets, food and beverage opportunities could be provided for in the planning of the

residential blocks. Likewise community meeting spaces.

Coastline location presents opportunity for uninterrupted access by hovercraft or drone transport, perhaps autonomous operation.

1	有關:香港群策匯思土地供應集思會	18/07/2018 05:07		
From:				
То:	tfls@devb.gov.hk,			

昨天有幸參與香港群策匯思土地供應集思會,深感榮幸,現將本人的相關意見提出, 以供 貴會參考。

配合一帶一路和大灣區發展的土地建議

筆者多年前已建議將貨櫃碼頭搬離現址,在網上專欄曾提出兩個方案:其一是在青衣島西南填海,加上現有的九號貨櫃碼頭,提升為自動化碼頭,而位於葵涌的一至八號碼頭則收回重新發展;其二是將所有貨櫃碼頭連同相關的產業,包括元朗一帶的物流場等搬到大鴉洲,並以隧道接駁到青嶼幹線近港珠澳大橋的入口。

現在筆者提出第三個建議,就是在香港以南珠海管轄的島嶼,挑選理想的地點以陸域 吹填方式像上海大小洋山港般發展全自動貨櫃碼頭,所不同的是無需要興建連接陸地 的大橋,而是以駁船的方式由小型貨櫃輪、內河船、駁艇或躉船等把集散到的貨物分 配到大灣區各港口,特別是中歐班列的口岸。

至於現有的葵青貨櫃碼頭,無需要另外在海中填出人工島,可以在青衣的西南岸非維 港範圍填出泊位以及後勤用地,青衣九號碼頭(北)已完成半自動化改造,繼續在九 號碼頭(南)進行提升,葵涌的八個碼頭則收回發展,而放棄以興建平台的方式。

這個建議有眾多好處:

- 1. 現時香港超過六成的貨櫃使用量屬於轉口,貨物從來沒有離開碼頭,將這六成的貨量移到外海,就能有效地縮減土地使用量,並透過全自動化提升效率和降低成本,同時解決貨運業人手青黃不接的問題。
- 2. 解決廣東省各地碼頭的惡性競爭問題,特別是深圳東邊的鹽田港集中做廣東省東岸及江西省的貨源,西邊的蛇口赤灣則可以收回使用。
- 3. 由於遠洋輪船只靠岸到大灣區超級碼頭,而到青衣海岸的則是小型船隻,有效地改善香港的空氣質素
- 4. 現有的基建道路可以保留使用,不需要另作投資
- 5. 大灣區碼頭可以由區內九市兩區集資興建,無需再糾纏於議會程序
- 6. 從台灣高雄把貨物運到廈門上岸,直接由中歐班列運到中亞及歐洲沿線得到啟發,包括香港在內的各市,可以透過水路將貨物集散在南沙港,除可使用中歐班列外,更可以透過南沙港鐵路,把腹地伸展到西南各省。

至於選址方面,除了坊間傳出的擔杆島選址外,筆者認為萬山列島的白瀝島和游泳島更為優越。受到地球自轉的影響,北半球河流的泥沙傾向右轉,導致灣區的西岸缺乏天然的良港,萬山列島的位置更靠近澳門珠海等地。在列島的北邊和西邊建設港區,有效防止珠江泥沙淤塞港口,向南門頸灣則設為貨場以阻擋來自南中國海的風浪,在

東邊留下人口,並加上防坡提,一個可容超級貨櫃輪的港口就此形成,不單只解決了香港的土地和產業問題,更有效提升大灣區物流競爭力。 (附圖)

1	浮島或可代替填海。		18/07/2018 04:02
From: To:	tfls@devb.gov.hk		

土地供應小組的工作人員們,大家好。

現在香港急需土地解決住屋難題,填海故然是好選擇。

但,快的方法也有,可以設計一些較大面積的浮島(Floating Island)。

先用鋼筋混凝土預製浮島的地板,裏面以預製了排水渠,電線管等必需管道。預留些地方凹陷如泳池,可填土作綠化用,或做泳池等用。有部份地方用來建樓用。該浮島是浮在海上的,要能夠抗颱風和海嘯等天災。

現在,有美國公司在大溪地 (Tahiti)計劃興建一座類似的浮島。在荷蘭,Rotterdam,一荷蘭公司有相似計劃。

再加上香港和國內的大學,建築界等人才。

不妨公開招納他們的設計,招標興建浮島和其上的建築物。解決住屋燃眉。

土地供應的選項不應包括填海和郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見:

政府必須優先使用棕地和私人遊樂場地契約用地,有研究已經指出,香港的棕地及粉 嶺 高爾夫球場等已經足以應付香港未來的房屋需求。

當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)興建房屋,也不應考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹慎看待,因為我們不能犧牲郊野公園的重要生態和生物。

請土地供應小組尊重民意,為香港市民保護自然環境。

萬分感謝!

政府必須停止研究發展郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶),及在維港以外近岸及東大嶼填海,不能被視為增加土地的選項,當局亦應小心處理農地等其他天然資源,因為我們要尊重大自然。

懇請土地供應小組聽取民意,令香港真正可持續發展。

順祝 國泰民安!

先用棕地,糾正規劃問題	
就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意	見:
政府必須優先使用棕地和私人遊樂場地契約用地,有研究已經指出,香高爾夫球場等已經足以應付香港未來的房屋需求。	港的棕地及粉 嶺
當局不應研究在郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶)與考慮在維港以外近岸和東大嶼填海,其他天然資源(例如農地)亦要謹們不能犧牲郊野公園的重要生態和生物。	
請土地供應小組尊重民意,為香港市民保護自然環境。	

Wong chi ho 謹啟

萬分感謝!

	Peng 對土地供應選項及相關議題的意見	18/07/2018 16:34
From: To:	tfls@devb.gov.hk	
致土地供應	專責小組:	

- 政府應優先發展棕地,有研究已經指出,香港的棕地及粉嶺高爾夫球場等已經 足以應付香港未來的房屋需求;
- 郊野公園及其邊陲地帶以及填海都不應該成為土地供應的選項(不論是短期、中長期或概念性選項),其他的自然土地資源(如農地)亦應謹慎看待。因為這些選項都會為香港的生態環境和天然資源帶來不能逆轉的破壞。
 - 請特區政府勇謀兼備,處理新界存積已久的土地規劃不公問題。

本人期望土地供應專責小組能將本人意見進一步反映予政府相關部門,讓香港能真正 落實可持續和以人與生態為本的發展規劃。

順祝 台安!

From:	То:	tfls@devb.gov.hk	

土地供應的選項不應包括填海和郊野公園邊陲地帶

就 貴小組針對香港未來土地供應的公眾諮詢,本人謹此表達以下意見: 當局須優先 利用棕地,還有私人遊樂場地契約用地,這將提升香港土地的使用效率。

郊野公園邊陲地帶(包括兩個試點和其他邊陲地帶),及在維港以外近岸及東大嶼填海,不能被視為增加土地的選項,當局亦應小心處理農地等其他天然資源,因為我們要尊重大自然。

希望土地供應小組聆聽民意,促請政府改善規劃,令市民真正安居樂業。

順祝 國泰民安!
