

Low Carbon Concrete Trophy Competition 2022

Notice No. 1

1. The Organising Committee (OC) has received a number of inquiries on whether the Competition will be deferred due to the latest pandemic situation and would like to provide the following responses:
 - a) The OC will continuously review the situation and may reschedule the Competition activities, e.g. test cube production, if necessary. Please be rest assured that any reschedule notice, if required, will be released in a timely manner to allow the participants to have sufficient time to prepare.
 - b) All parties interested in the Competition are encouraged to hand in their registration forms as early as possible (the deadline of registration remains to be 15 March 2022) in order to facilitate the timely arrangement of resources (e.g. test cube production raw materials) required for the Competition. The OC will send the details of the concrete constituent raw materials to be provided to the teams and all other necessary information (e.g. cost and carbon emission data) to all the registered teams soon after the registration deadline in order to allow all teams to have sufficient time to carry out their concrete mix design and laboratory trials.
 - c) For the Students Category, all students (including final year students) currently enrolled in the relevant disciplines of study as indicated in the Rule Book are welcome to form teams to join the event. Some interested students have indicated to the OC that they may have difficulty in participating in the production of test cubes, since some foreign/mainland students in their teams may have left Hong Kong SAR when the activity is being held. In such a case, provided that other team members unanimously agree on their absence and have no concern, the team is welcome to continue to participate in the test cube production but replacement of the absentees in the team would not be allowed.
2. Some minor editorial amendments have been made to Section 3.2 of the Rule Book and Forms. The updated version (Version 1.0) has been posted on the competition website:
