							(B1) Total									

Part 5 : Signature of Principal Contractor-Applicant

☐ I understand that it is the applicant's responsibility to comply with all approval conditions, including the requirement of a minimum manning ratio of 1:2 (i.e. one imported labour to at least two full-time local labour) during the contract period ^{Note 9} .

☐ The above manning ratio requirements is not met because of the following reasons :

Signature of authorised representative:

Note1

Applicant should complete a separate Manpower Plan for each works contract (including the works contract under application and the supplementary contract(s) (i.e. the other pre-approved works contract(s) specified in the Standard Employment Contract for which the imported labour will be deployed to work and such contract(s) should be under the applicant))

Note2

The number in brackets refers to the corresponding number of "trade" in Schedule 1 of the Construction Workers Registration Ordinance.

Note3

A full-time labour is one who works not less than 35 hours per week. The number filled in is an average number, which is the current plan of the applicant, and may need to be reasonably adjusted having regard to the changes in the construction site and the work sequence during actual implementation.

Note4

Should the principal contractor-applicants or their sub-contractors wish to retain the imported labour in employ after the expiry of the approved quotas, the principal contractor-applicant needs to apply for fresh quotas.

Note5

Please retain the details of the figures in application for the approval authority to check as necessary.

Note6

(A1 x number of months in which manpower required + A2 x number of months in which manpower required + A3 x number of months in which manpower required + A4 x number of months in which manpower required)/ Total number of months in which manpower required.

Note7

Excluding overtime pay.

Note8

This manpower plan is provided for the Approval Authority to consider the manpower requirements of the works contract under application. It is the applicant's responsibility to calculate the manning ration to ensure compliance with the requirement of a minimum manning ratio of 1:2 (i.e. one imported labour to at least two full-time local labour (including frontline staff, workers, technicians, etc. but excluding managerial staff)) during the contract period.

Note9

The above-mentioned minimum 1:2 manning ratio is only applicable to the works contract under application, but does not apply to the supplementary contract(s).

Note10

Please note that the processing of applications will be completed within two-month time after the closing of the application period. Once the application is approved, the principal contractor-applicant/employer(s) may require additional time to submit a visa/entry permit application to the Immigration Department. Upon receiving all required documents, the Immigration Department generally takes six to eight weeks to process visa/entry permit applications. Therefore, the principal contractor-applicant/employer(s) should realistically estimate the arrival time of the imported labours.
