- Note :
- \* The water main was laid over 30 years ago. As the water main was laid long time ago, the WSD does not have accurate record on the year when the water main was laid.
  - \*\* Where the water supply suspension is expected to last for more than three hours, the WSD would arrange emergency provision of temporary water supply (including water wagons, water tanks and temporary standpipes).
  - \*\*\* Only toilets and the convenience store inside the Wu Kai Sha Station were affected. For safety reasons, repair works to the water main could only commence after completion of the strengthening works to the underground soil in the Lok Wo Sha works site.
